# Declaration of turnover

The assessment basis for the contribution of ordinary members and special members shall be determined from the various categories in each of the following ways.

## For our client we choose the following category for the tax base.

### Category A: Service providers of the digital economy

Service providers of the digital economy report gross income to calculate the membership fee. Gross income includes all income and commissions generated in Germany by means of customer-specific consulting and implementation services for all areas of service according to the definition of the BVDW for the digital economy (no hosting or access sales). Included in the gross income are only net sales (without VAT) in the area of solutions for all major interactive platforms:

- Consultation
- Design
- Implementation (design and programming)
- License revenues
- Commissions (CPX models)
- Other gross income from media representation (media, without VAT, minus discounts and bonuses)

### Category B: Buyers for services of the digital economy/advertising industry

Buyers for services of the digital economy/advertising industry report the order volumes or the budget to calculate the membership fee

### Category C: Digital economy provider

Providers from category C report total sales (excluding sales tax) for contribution calculation.

To calculate the contribution amount, the determined contribution assessment basis is transferred to the following contribution table.
